- **Data Platforms &Databases:** Databricks, AWS Redshift, SQL Server, PostgreSQL

PROFESSIONAL EXPERIENCS & LEADERSHIP

Commercial Data Analyst (RevOps) — 2025 February - Present

Humanforce (Workforce Management Software Service), North Sydney

- **Partnered closely with key decision-makers and cross-functional stakeholders** across Sales, Marketing, Professional Services, Human Resources and Finance to iteratively refine reporting solutions that surfaced multidimensional KPIs, identified trends, gaps, and improvement opportunities to support strategic planning and operational decision-making
- **Cleaned, processed, and validated** complex cross-functional datasets to ensure data integrity, consistency, and reliability across systems, while initiating process improvements to enhance data quality and streamline reporting cadence
- **Developed 40+ Real-time Power BI Reports/5 Apps and hosted 10+ organisation-wide certified semantic models** to strengthen reporting scalability, accessibility, data governance, and self-service analytics capacity across the business

Data Analyst (Marketing, Sales & Ops) — 2024 August - February

VT Markets (Financial Brokerage Services), Sydney CBD

- **Enhanced reporting efficiency by 80%** by automating data source integration and initiating an integrated Marketing Performance Dashboard to meet the department's KPIs monitoring, reporting, and strategic planning requirements
- Analysed the client's large database and deployed machine learning models (Regression, Decision Tree, and Clustering) for segmentation and behavior prediction to enhance sales and operation decision-making
- Surveilled meticulously the operating expenses, communicated with executives and business functions to investigate discrepancies and discover abnormalities, and facilitated with regional operational planning
- Collaborated closely with data center and engineering team to ensure data quality; meanwhile maintain frequent and smooth communication with internal stakeholders to ensure accurate and timely delivery
- Coordinated cross-functionally between Finance, HR, and Management to support strategic initiatives and decision-making

Property Development (PD) Analyst — 2023 August- December

Sankofa Fund Management Ptd Ltd, North Sydney

- Managed PD workflow by conducting regular status meetings with key stakeholders and documenting major decisions
- **Drove project delivery 30% above baseline** by adopting Agile into process flow, encourage clear timeline, KPIs (milestone objectives), and continuous iterations
- Proposed data-informed recommendations for organisation's property investments using Geospatial Information System (QField) and Business Intelligence tools (Tableau)

HIGHLIGHTED PROJECT

Forecasting Models and Risk Modelling - Python

High Rollers Pty Ltd (High Distinction)

- **Delivered 30% improvement in model risk forecasting** (as compared to the incumbent model) by coordinating with team members and managing project phases from exploratory data analysis to GJR-GARCH model implementation and testing
- Communicated project outcomes in non-technical manner, simplifying complex data insights for executive decision-makers
